

MOONRAY INSTITUTE OF PHARMACEUTICAL SCIENCES

(Sponsored by Moonray Educational Society)

(Approved by AICTE & PCI, Affiliated to JNTU, Hyderabad)

Near Tollgate, Adjacent NH-44, Vill. Raikal, Mdl: Shadnagar, Farooqnagar,

Dist. Ranga Reddy - 509202

Ph: 08548-213259, Mobile: 9985119801, 9000004806, 9989456507

3.2.1 Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge

Through the use of the incubation centre, the institution fosters an atmosphere in which students and teachers can share their technical experience with one another in order to accelerate the process of innovation. The college establishes a research and development unit, which is overseen by the principal, in order to provide assistance to research initiatives.

The Research and Development cell is primarily concerned with student projects, both small and large in scale, that are funded by various funding bodies and are performed during the course of the academic year. It is possible for staff members and students to publish articles of excellent quality in reputable journals that have a high impact factor with the support of the research and development cell.

Training is provided by the Research and Development section on how to write a paper, how to avoid plagiarism, and how to find respectable journals. All of these things are helpful for students and academics in completing their research responsibilities. The administration takes a particular interest in research endeavours and encourages both students and faculty members to investigate novel and original concepts by providing the necessary infrastructure and financial support. At the Ideathon event, which takes place annually, students from a wide range of disciplines come together to generate fresh and original concepts.

By providing students with the opportunity to develop their managerial and leadership skills, attend and participate in workshops, and visit industries, the College's Entrepreneur Development Cell (EDC) aims to develop entrepreneurs who create jobs through technology and to improve students' competence in order to meet global demand and new challenges to create employment. This is accomplished by providing students with the opportunity to visit industries. Acting, seeking self-employment, and beginning a small or microbusiness are all things that students are strongly encouraged to do.

Resource planning, personnel management, financial planning, marketing management, and manufacturing understanding are some of the skill sets that are necessary to establish oneself as an entrepreneur. The EDC wants to provide future engineers with the opportunity to learn about these areas of need in order to assist them in becoming successful business owners.

The goal of the institution is to close the gap between the two. Students are provided with learning opportunities, and an environment that is supportive of their research interests and social commitments is fostered during their time at the institution.
